Dominic M. Calabro  
President & Chief Executive Officer

David Casey  
Chairman of the Board of Trustees

Florida relies heavily on local governments to provide services to its residents. The state's counties, cities, school districts, and special districts raise and spend more money combined than Florida's state government. The levels of taxing and spending in different jurisdictions across the state vary considerably. This new edition of Florida TaxWatch's *How Florida Counties Compare* will help you see how your county stacks up against the other 66 counties.

Property taxes and local government spending have been receiving considerable attention in Florida. The Governor and Legislature have announced plans to provide significant tax relief through a proposed constitutional amendment, or amendments, that will go before the voters in November 2026. The Florida Department of Government Efficiency (DOGE) is conducting audits of local governments, highlighting rapidly rising spending and wasteful or unnecessary expenditures. This makes the data contained in this report even more important and can provide legislators with the information needed as they deliberate these issues.

While property taxes get most of the public attention, they are only part of the local government revenue picture. The more than 60 tables, charts, and graphs in this report provide comprehensive information on local tax rates, tax collections, other revenue sources, and city and county expenditures.

Florida TaxWatch provides this report as a reference tool for Florida's taxpayers, policymakers, and elected officials. I hope that you will use this guide as a resource to better understand the cost of your local governments and how those costs stack up with other localities.

Sincerely,

Dominic M. Calabro  
President & CEO  
Florida TaxWatch

# HOW DOES YOUR COUNTY COMPARE?

## *A Guide to this Guide*

Local taxing and spending is a major part of Florida government operations. More than half of all Florida government revenue is raised at the local level, the largest share in the nation. Florida's 67 county governments (including Jacksonville's consolidated government), more than 400 municipal governments, and more than 1,400 independent special districts spend more than \$120 billion annually.

This report compares the revenue and expenditure profiles of Florida's 67 counties to give taxpayers an overview of how their local government stacks up with the rest of the state. The report presents the most recently available data regarding property taxes, other taxes and fees, county and municipal revenues, county and municipal expenditures, and other related measures. Per capita figures are determined by using population figures for the year for which the data is used.

While the focus is on county and municipal governments, this report includes information on all types of local jurisdictions, including special districts and school districts, and most data are grouped geographically by county.

Property tax data comes from the Florida Department of Revenue. Most of the Other Tax and Fees data is compiled

by the Florida Legislature's Office of economic and Demographic Research. Based on the system developed by the Florida Department of Financial Services, known as the Local Government Electronic Reporting (LOGGER) System, this report classifies local government revenues into six categories: property taxes; other taxes; charges for services; permits, fees and special assessments; intergovernmental revenues; and other revenues.

Expenditures are classified as general government, public safety, courts, physical environment, transportation, economic environment, human services, and culture and recreation.

This report uses the most recently available data, but the limitations of that data must be considered. Data are self-reported by local governments and errors and omissions can occur. While the classification system helps, there may be some differences in how governments account for similar functions. Also, this report often groups county and municipal data into geographic county totals in order to derive an average for all residents in the county. Depending on where in the county a person lives, deviations can occur.

# HOW DOES YOUR COUNTY COMPARE?

## *A Guide to this Guide (cont'd)*

This report excludes custodial funds and interfund transfers from revenue and expenditure amounts. Custodial funds are funds held by a local government for another entity, such as taxes collected by a county on behalf of cities and special districts. Interfund transfers are funds moved from one of a government's funds to another, where it will be eventually spent. Including custodial funds and interfund transfers can result in double counting of revenues or expenditures.

This report compares the magnitude and makeup of Florida's local governments' fiscal operations. It does not attempt to compare or evaluate levels of service.

Florida TaxWatch hopes the information in this book can help taxpayers make those assessments for themselves, for it is only through knowledge and participation that you can decide if you get the government you pay for.

# IMPORTANT TERMS AND DEFINITIONS

- **FISCAL YEAR/PROPERTY TAX YEAR** — Local governments' fiscal year runs from October 1 to September 30. Property tax revenue for a fiscal year are based on the assessment made the previous January 1. For example, FY 2022-23 property taxes are based on the January 1, 2022 assessment. Tax bills are sent out in November 2022, and taxes are considered delinquent on April 1, 2023.
- **LEVY** — The imposition of a tax, fee, charge for service, or fine by a government.
- **MILLAGE** — The tax rate levied on real estate or other property, expressed as dollars per \$1,000 of property taxable value. For example, a tax rate of 15.5 mills on a property with a taxable value of \$200,000 would result in a tax bill of \$3,100.
- **JUST VALUE** — The just or market value of a property is the value that the property would likely sell for in the current market.
- **ASSESSED VALUE** — The assessed value of a property is the value of that property after any assessment caps, such as Save Our Homes, or the 10 percent non-homestead cap on non-residential properties.
- **TAXABLE VALUE** — The taxable value of a property is the assessed value minus any subsequent exemptions, such as the homestead exemption. This is the value upon which the millage is imposed and the property taxes are then collected.
- **TANGIBLE PERSONAL PROPERTY (TPP)** — Personal property which can be touched and physically relocated, such as furniture, machinery, equipment, computers, and signage. Household goods and most vehicles are exempt. This tax is only paid by businesses. Inventory held for sale is exempt and there is a \$25,000 exemption for all TPP taxpayers.
- **LOCAL OPTION SALES TAX** — Local governments may assess up to nine types of local discretionary sales surtaxes: Charter County and Regional Transportation System; County Public Hospital; Emergency Fire Rescue Services and Facilities; Indigent Care and Trauma Center; Local Government Infrastructure; Pension Liability; School Capital Outlay; Small County; and Voter-approved Indigent Care.

17	Santa Rosa	\$4,511.59	33	Lee	\$3,519.18	50	Hernando	\$2,667.99	67	Baker	\$1,451.73

Includes all reported city government revenues and uses incorporated population (people living in municipalities) to calculate per capita amounts.

Excludes custodial revenue and inter-fund transfers.

Source: Florida Legislature, Office of Economic and Demographic Research, Florida Department of Financial Services and Florida TaxWatch, November 2025.

\*The City of Moore Haven operates the Capital Projects Finance Authority, a non-profit corporation that makes loans to public agencies inside and outside of Florida. CPFA has revenues and expenditures of over \$40 million and a population of 1,529, which inflates Glades County per capita amounts.

# ABOUT FLORIDA TAXWATCH

As an independent, nonpartisan, nonprofit taxpayer research institute and government watchdog, it is the mission of Florida TaxWatch to provide the taxpayers of Florida and public officials with high quality, independent research and analysis of issues related to state and local government taxation, expenditures, policies, and programs. Florida TaxWatch works to improve the productivity and accountability of Florida government. Its research recommends productivity enhancements and explains the statewide impact of fiscal and economic policies and practices on citizens and businesses.

Florida TaxWatch is supported by voluntary, tax-deductible donations and private grants. Donations provide a solid, lasting foundation that has enabled Florida TaxWatch to bring about a more effective, responsive government that is accountable to the citizens it serves since 1979.
