Aultman & Taylor Steam Engines

(Following list gives the first # for the year)

1897 5148	1898 5286
1899 5493	1900 5759
1901 5940	1902 6127
1903 6347	1904 6548
1905 6806	1906 7057
1907 7374	1908 7616
1909 7703	1910 7876
1911 8124	1912 8291
1913 8439	1914 8618
1915 8897	1916 9090
1917 9186	

Avery Steam Engine

Below is first number for the year:

1890 1	1895 75
1897 200	1900 600
1901 918	1904 2025
1906 2700	1908 3235
1910 3807	1911 4200
1912 4529	1913 4808
1914 5013	1915 5220
1916 5328	

B. F. Avery Tractors

There are no known listings of tractors from Avery Co., Peoria, Illinois. This list is for tractors from B. F. Avery Co., Louisville, Kentucky.

This list shows the beginning # for the year:

•Avery 'General' 1942-43	1A000-1A1388
•Model A 1944-46	1A1389-8A600

+++++

•Model A		
1945 4A786	1946 7A305

●Case Tractors, 1912-1928

1912	101-890	1913	891-2495
1914	2496-2841	1915	2842-3690
1916	3691-7491	1917	7492-13284
1918	13285-22222	1919	22223-32840
1920	32841-42255	1921	42256-43942
1922	43943-45280	1923	45281-48412
1924	48413-51677	1925	51678-55918
1926	55919-62408	1927	62409-68403
1928	68404-69803		

Note: A 6-digit s/n system was adopted in 1928. To determine the year built, take the first and fourth digits and subtract 3 to get the year. (300201 is: 32 - 3 = 29, or 1929.)

The 7-digit system was adopted in 1938. For these numbers subtract 4 from the first two digits. (4216817 = 42 - 4 = 1938).

On D, LA, and S-Series, # is stamped on plate fastened to instrument panel; also on left rear of engine block where it bolts to transmission. On VA-Series, # is stamped on plate on instrument panel. 7-digit system dropped in 1953.

●VA Tractors (beginning #)

John Deere Engines

(John Deere Type E engines first came out in 1923. From then to 1926 Deere continued to build the Waterloo Boy engines, but these are included in the same serial number series).

Eagle Tractors

No serial # list available, but we have the following production information:

●Eagle 6A, 22-37	1930-
●Eagle 6B, 18-26	1936-
●Eagle 6C, 18-26	1937-

Economy, Hercules, Thermoil, &c.

Information on Hercules, Thermoil, Jaeger, Arco, and Economy engines is available in the book, A History of Hercules. Order from:

Glenn Karch
20601 Old State Road,
Haubstadt, IN 47639

Fairmont

Information on Fairmont Engines available from:
Fairmont Railway Motors Inc.,
Fairmont, Minnesota

Fairbanks-Morse

This listing was compiled at Fairbanks-Morse many years ago, but no one knows why it only begins with 1911. It also appears that the F-M Eclipse engines used a different number series, at least in early production. It is possible that the F-M Engineering Dept. at Beloit, Wisconsin might have some of the early engines on microfiche.

²DW prefix is for Wico mag;

D prefix is for International

•International Harvester Tractor Works and Milwaukee Works

In terms of total numbers, IHC may not have been the largest engine builder in the world, but in terms of the number of models, they surpassed everyone. The first listing, on pages 23-26 is from Tractor Works in Chicago. It comprises primarily the Mogul engines and tractors. Output from Milwaukee Works follows on pages 27 to 37. Here is where you will find the Famous engines, the Titan engines and tractors, and the like. Having the two-letter prefix for your engine or tractor will be very helpful. Pages 38-40 have the listings for tractors, beginning with the 10-20 & 15-30. The McCormick-Deering LA & LB engines are on page 20, and the IHC Type M engines are on pages 21 and 22.

The paint color listings show comparable color matches for many IHC engines, tractors, and implements. Some notes of interest are that the Mogul line was generally Olive Green, and occasionally on Mogul engines the flywheel rims and some other parts were trimmed in IH Blue or IH Red. Also, engines that were sold by the Osborne dealers were usually blue. Thus, it is possible to find an occasional Famous engine that was blue instead of red.

Color standards of the 1920s were far different than today, so there is a considerable variation in the gray color used on the 10-20 & 15-30 tractors. The paint listing shows the most commonly used numbers. Also, the gray finish ended in 1936, with everything being red from then on. However, there will be some tractors painted red prior to that time, but no one knows which ones or how many. A few IHC Type M engines will be found in Olive Green rather than the usual dark Adirondack Green, as well.

Our book, 150 Years of International Harvester gives details of the IHC merger. In a few words, IHC had separate Deering, McCormick, Osborne, and other dealers, all operating under the IHC corporate umbrella. That's why there were entirely separate lines. Deering dealers sold Titan, and McCormick dealers sold Mogul. It appears that all of them sold the Famous engines, but the Osborne dealers got engines painted blue instead of the usual red.

Witte Engines

The serial records of Witte gasoline engines were often recorded on a random basis, making it quite difficult to provide a consolidated listing. However, the following list will provide approximate building dates of Witte engines, but there will be occasional engines that may have been built several years before or after the dates shown. Thus, this listing is only a general guide. Specific s/n information is available from: C. H. Wendel, PO Box 257, Amana, IA 52203 for a nominal search and postage fee of \$5. We also have serial number listings for the Witte diesels.

Witte Standard and Star engines were built from August 1894 to November 1914. All engines under 5747 are either Standard or Star. A few Standards were built up to s/n 16810.

Witte Junior engines were built from January 1911 to November 1923. The first one was s/n 5748, and the last one was 62047.

Manufacturers Engine Co., (MECO) engines were built from Sept. 1915 to April 1920. The starting no. was A1000, and the last was A5950.

Type B & C throttling governor engines began with B101 (Jan. 1922) and ended with B50000 (September 1927).

Type F & Type H throttling governor engines using a clamped hopper on the Type B and Type C cylinders were begun in Sept. 1927 with B50001, and ended with B61721.

New Style F & H engines with a faced cylinder and bolted-on hopper began with s/n 75000

Paint Colors

The following list has been compiled from many different sources, and while we believe this list to be accurate, we make no guarantees of any kind. **CHECK IT OUT YOURSELF!** before buying your paint.. One digit difference in the number can make the difference from green to blue!

There were wide variations in the colors used, especially on older equipment. If you have a good color chip, use it. Let it be clear to all that where this list and the use thereof is concerned, you're on your own!! We disclaim any liability or responsibility to anyone for any reason whatever in connection with this listing, and with this notice, you are hereby notified!

The numbers in the right hand column are DuPont numbers. If we have a match, Ditzler will show as DIT, Martin-Senour as MAS, and Sherwin-Williams as SW.

Don't even think of using these materials without the proper safety equipment, including a respirator! Getting this stuff into your lungs is only for those with a death wish. Some finishes use deadly isocyanates that will eat up your lungs, just for starters. So use a respirator, and change those cartridges. Also, keep your skin protected as well; some of this stuff can be absorbed and do awful internal damage to your body. For safety information, talk to your local paint distributor, and they'll be glad to help.

For detailed information on surface preparation and proper use of these products, again, contact your local distributor. They will recommend the proper materials and methods for you.

Engines, tractors, and industrial equipment are all alphabetically arranged in the listing:

●●●●●

- Abbott Jordon Hoist, Green Industrial 661-29042

Additional Colors

We were fortunate in obtaining some old color chips as early as 1915. At that time the range of colors was rather limited, and there were no number codes, just a name. We've analyzed the chips we have, and have converted them into a reasonable match. These are DuPont numbers.

Auto Gray (light gray)	Gray	72092
Autumn Brown (lt brn)	Brown	29607
Black	Black	099
Brewster Green	Brewster Grn	24166
Carmine Lake (lt. maroon)	Red	4992
Chrome Yellow (dk yellow)	Yellow	218
Coach Green (dk olive)	Green	7498
Cream	Cream	43938
Dark Blue	Blue	63203
Dark Wine (maroon)	Maroon	143
Deep Turquoise	Aquatone Blue	58360
Quaker Green (very dk olive)	Green	2015
Royal Blue	Blue	2063
Vermilion	Red	2622

These colors, and combinations of them were used for many different pieces of farm equipment. For example, the Brewster Green or something similar was used on the Rumely OilPull, some of the Stover engines, and numerous other farm machines, as well as many different cars.

One reason for the great variations in paint color is that the material was usually bought on contract, and varied from one manufacturer to another. Thus, there will be major differences in shade from time to time. Even today, manufacturers recommend that if you buy two quarts of paint that you mix the two together before starting to avoid subtle changes in shade from one can to another.

As noted at the beginning of this section, use these materials with care. Forget about those virtually worthless gauze face masks. All they do is strain out the major chunks, but they do nothing to keep those nasty fumes out of your lungs. Spend the money for a good respirator, get paint cartridges for it, and change those cartridges! Wear protective clothing to keep the product off your skin as well. These products are safe if you use them per the manufacturer's recommendations and we recommend strongly that you do so.

Additional color schemes are always welcomed for future editions of the Notebook. This Third Edition has more than ever before, but more are needed. Let us know of any needed corrections.

3000	Dec. 22, 1908
4000	March 15, 1910
5000	April 14, 1911
6000	May 15, 1912
7000	Dec. 19, 1912
8000	Oct. 27, 1913
9000	June 9, 1914
10000	Dec. 12, 1914
11000	July 9, 1915
12000	Jan. 19, 1916
13000	Aug. 2, 1916
14000	Dec. 19, 1916
15000	April 14, 1917
16000	Aug. 4, 1917
17000	Feb. 25, 1918
18000	July 19, 1918
19000	Oct. 28, 1918
20000	Feb. 15, 1919
21000	July 29, 1919
22000	Dec. 5, 1919
23000	April 20, 1920
24000	Sept. 7, 1920
25000	Jan. 6, 1921
26000	Nov. 14, 1921
27000	July 19, 1922
28000	Feb. 15, 1923
29000	June 30, 1923
30000	Jan. 7, 1924
31000	Aug. 29, 1924
32000	May 8, 1925
33000	Nov. 12, 1925
34000	May 11, 1926
35000	Oct. 6, 1926
36000	April 2, 1927
37000	Nov. 21, 1927
38000	May 22, 1928
39000	Jan. 24, 1929
40000	Aug. 24, 1929
41000	March 17, 1930
42000	Nov. 17, 1930
43000	May 18, 1932
44000	Aug. 13, 1934

Novo Engine Serial Numbers

Note: Novo Engine serial numbers are very difficult to tabulate on a yearly basis since random numbering was often used. Therefore, this listing is only a general guide. Also, engines after 1930 are extremely difficult to catalog. Specific data is available from: C. H. Wendel, Box 257, Amana, IA 52203.

Up to 40000	July 30, 1918
43545-53855	1919
53856-71046	1920
71047-74059	1921
74060-79169	1922
79170-84866	1923
84867-89931	1924
89932-94587	1925
94588-97197	1926
97198-100394	1927
100395-101841	1928
101842-102439	1929
102440-102791	1930
102792-	1931

Palmer Marine Engines

The last two digits of the serial number is the year built.

Index

Advance Thresher Co., steam	2
Advance-Rumely (OilPull)	2
Allis-Chalmers	3
Aultman-Taylor, steam	7
Avery Steam Engines	7
B. F. Avery, tractors	7
Baker Mfg. Co., Monitor Engines	81
Briggs & Stratton	8
J. I. Case Company	9
Caterpillar Tractor Co.	10
Cletrac & Oliver-Cletrac	51
Cockshutt Tractors	12
John Deere Engines	12
John Deere Tractors	13
Eagle Tractors	15
Economy & Hercules Engines	15
Fairmont Engines	15
Fairbanks-Morse Engines	16
Ferguson Tractors	16
Ford & Fordson Tractors	17
Fuller & Johnson Engines	17
Gaar-Scott Steam Engines	18

M. Rumely Steam Engines	2
Silver King Tractors	55
Stover Engines	55
Twin City Tractors	46
Wallis Tractors	42

Wisconsin Air-Cooled Engines	55
Witte Gasoline & Diesel Engines	56
Webster Magnetos, Bracket # List	57
Webster Magnetos, Alpha Eng. List	60

Addenda

Cushman Cub Engines are similar to DuPont 32565 Gray. Those built for and sold by John Bean Co. on their spray pumps are apparently green, similar to the listing on page 67.

Racine-Sattley engines are red, similar to DuPont RS901.
