Savage Municipal Water Supply Superfund Site Explanation of Significant Differences Public Notice

The Agency is soliciting public comments on the Explanation of Significant Differences (ESD) for the Savage Municipal Water Supply Well Superfund Site during the 14-day public comment period starting on May 15th, and ending on May 30th. Written comments on the ESD and Administrative Record can be submitted via <https://www.regulations.gov> (Docket ID No. EPA-R01-SFUND-2026-0826) (EPA preferred method), email at **dewey.jeffrey@epa.gov**, or phone at 617-918-1229.

This ESD includes the following changes to remedial activities:

- Injecting chemical oxidants into bedrock at the source area to break down contaminants in groundwater;
- Groundwater extraction from bedrock to control contaminant and chemical oxidant migration;
- Adding an impermeable cap to the source area to prevent source area groundwater migration to bedrock.

All comments are reviewed by EPA prior to finalizing the ESD. EPA will respond in writing to all substantive comments received during the public comment period in a responsiveness summary to be issued with the ESD. Additional information on the site is also available at: www.epa.gov/superfund/savage
